

# PHOTOGRAPHY GUIDE FOR SCOUTS

campspace

# OUR MISSION

Outside you reconnect with yourself and with your travel buddies. That's why we love **local** and **sustainable** getaways in **nature**.

As a scout you play an important role in **inspiring** more people to go on a micro adventure.

Let's reconnect outside.

Have fun! :-)

# 2

## YOUR MISSION

A picture are worth a thousand words. Your goal is to inspire others. How can you do this?

**Tip: People in photos have a positive effect.**

**Tip: Bring attributes that make the photos more livey (lights, blankets)**

Carefully follow the shot list shown on the next page.

# 3

## SHOTLIST

> **Site overview** (5 wide shots)

Tip: Use your friend, food and gear for ultimate shots.

> **Host portrait** (1 shot, if possible)

> **Nature around the site** (3 shots)

> **Activities on the site** (3 shots)

> **Facilities on site** (2 shots)

> **Uniqueness of the site** (2 shots)

Take **at least 3** photos of you or your travel buddy.

# SITE OVERVIEW

At least 5; horizontal photos

# HOST PORTRAIT

1; horizontal photos  
if possible

# NATURE AROUND THE SITE

At least 3; horizontal photos

# ACTIVITIES ON THE SITE

At least 3; horizontal photos

# FACILITIES ON THE SITE

At least 2; photos

# UNIQUENESS OF THE SITE

At least 2; photos

# 4

## EDITING YOUR PHOTOS

Editing doesn't have to be difficult. We like to keep the photos as close to reality as possible.

Tweaking the brightness and warmth of your photos, can make a huge difference.

Check out the examples on the next page.

A video frame showing a tent pitched on a grassy bank next to a pond. The scene is lit with natural, slightly overcast light. The tent is olive green with a white interior and red and blue accents. The pond reflects the surrounding trees and a building in the background.

# ORIGINAL

A video frame showing the same tent and pond scene, but with enhanced lighting. The colors are warmer and brighter, giving the scene a more inviting and pleasant atmosphere.

# GOOD EDITING

Warm and bright

A video frame showing the same tent and pond scene, but with extreme lighting. The scene is very warm and bright, with a yellowish tint, making it look unrealistic and overexposed.

# BAD EDITING

To warm, to bright and  
on top of that, not  
close to reality

# AFTER YOUR VISIT

- > Edit your photos warm and bright
- > Upload your photos to the Scout App (within 3 days after your trip)
- > Add your review in the Scout App
- > Keep an eye on your email, you will be notified when your work has been approved
- > Check out the Scout App for more micro adventures
